

WALL PROTECT

Natural. Breathable. Invisible Protection.

A transparent, bio-based protective coating that preserves the natural beauty of mineral surfaces while providing durable, long-lasting protection. For healthy buildings that stand the test of time.

Plant-based protection for natural building materials.

KEY FEATURES

- Transparent, matte to low-sheen finish
- Breathable — allows moisture vapour to escape while protecting against the elements
- Bio-based using renewable plant oils and natural ingredients
- VOC-free — extremely low VOC content ($\pm 0,98$ g/L)
- Free from petrochemicals
- Biodegradable
- Suitable for interior and exterior use
- Helps maintain the original appearance of the substrate
- Ideal for heritage and historic buildings

SUITABLE SUBSTRATES

- Face brick
- Natural stone
- Clay brick
- Cementitious plaster
- Lime render
- Also available for:
- Lime plaster
- Hemp-lime (hempcrete) plaster systems
- Terracotta tiles
- Slate

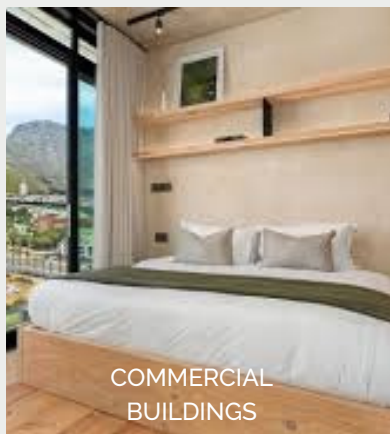

BENEFITS FOR ARCHITECTS & CONTRACTORS

Protects mineral surfaces without creating a film
Maintains the natural texture and appearance
Supports breathable wall construction
Compatible with lime, clay and hemp building systems
Uses renewable, plant-based ingredients
Ideal for sustainable architecture and green building projects
Durable protection while allowing the building to breathe
